SAI MIHIR JAKKARAJU

AI Systems | Agentic AI & RAG | Applied ML Engineering

Bengaluru, India | +91 93799 99739 | saimihir.j@gmail.com | linkedin.com/in/sai-mihir-jakkaraju | github.com/saimihirj

SUMMARY

Applied AI engineer with 3 years of experience across enterprise AI agents, retrieval pipelines, and data systems. Deployed a production AI agent at Check Point on Azure and Copilot, built Sift, a Python platform with hybrid RAG, multi-provider LLM routing, and a LoRA fine-tuning pipeline, and builds internal tools for an AI-native startup. Research background in NLP and AI-human systems, with two publications.

EXPERIENCE

Founder's Office (GTM), Cube Bengaluru | Jun 2026 - Present

- Built an internal multi-account LinkedIn outreach platform for Cite (Next.js, Supabase Postgres with Realtime, Vercel, Gemini as the default model provider, Google Sheets mirrored through Apps Script), tracking each contact from connection request to booked meeting for a team sending about 1,000 messages a week.
- Built and shipped **Cube CRM** (React + FastAPI), an internal tool built from direct requirements gathering with end users, replacing manual tracking with a single system of record.
- **Cite AI (PMM) and StoreHQ (PMS):** Took Cite (citehq.ai), a GEO product, and StoreHQ (storehq.ai), a Shopify and D2C growth product, from zero to one across LinkedIn, email, and cold outreach calling; used AI to draft and refine outreach sequences for a 5,800-contact US agency campaign.

Business Data Integrity Specialist (Finance), Check Point Software Bengaluru | May 2025 - May 2026

- Designed and shipped a production AI agent (Azure + Copilot) covering prospect validation, discrepancy tracking, commission allocation, and attainment tracking, now live across Sales, Data Integrity, and Order Management.
- Maintained **99%+ data accuracy** across Salesforce and SAP for **10,000+** records through daily audits and reconciliation, and documented root causes and remediation in playbooks other teams could act on.
- Built Anaplan tooling automating commission and validation workflows, cutting recurring data issues by **approximately 40%**.

Venture Fellow (Cohort 10), The VC Fellowship Bengaluru | Jan 2026 - Apr 2026

- Selected via a multi-stage process (**approximately 3 to 5% acceptance**); ran sourcing and diligence across deep-tech, fintech, and SaaS, evaluating technical differentiation claims made by founders.

Predoctoral Research Associate (Strategy), Indian School of Business Hyderabad | Aug 2023 - Apr 2025

- Applied NLP (spaCy, BERT) across **2,000+** deal announcements and earnings-call transcripts to extract structured signals from unstructured technical and financial text.
- Co-authored research through full peer review and revision cycles, writing for a technical academic audience that does not accept unsupported claims.

Technology Consulting Intern, PwC India Chennai | Jan 2023 - Jul 2023

- Built LLM document-processing and retrieval pipelines (Hugging Face, OpenAI API, PyTorch, Haystack) and a Streamlit dashboard over **5,000+ pages** of technical documentation.

PROJECTS & PUBLICATIONS

- **Sift** (github.com/saimihirj/Sift): Python and FastAPI platform that scores startup pitch decks (PDF, PPTX, URLs) against five VC pillars and runs an adaptive evaluation, with a model router across seven providers (Groq, Anthropic, OpenAI, Cerebras, OpenRouter, Gemini, Ollama) that handles streaming, continuation of cut-off answers, and token, latency, and throughput tracking.
- **Sift retrieval and training:** hybrid retrieval combining ChromaDB dense search (all-MiniLM-L6-v2), BM25 keyword scoring, and knowledge-graph expansion; a LoRA/QLoRA fine-tuning pipeline (peft, trl, Optuna) with an evaluation harness against the base model and an OpenAI-compatible serving layer; covered by pytest and GitHub Actions CI.
- **Publications:** “AI-Human Collaboration as Multi-Agent Adaptation” (arXiv, 2025); “Home Layout Design by Semantic Parsing of Text” (Taylor & Francis, 2023).

EDUCATION

B.Tech, Computer Science & Engineering (ML & Data Science), PES University Bengaluru | 2019 - 2023

CGPA 7.68/10 (Distinction) | *Published thesis on semantic parsing for layout design*

- Jury member for CIE Ignite Phase 2 startup presentations at PES University, evaluating early-stage student ventures.

SKILLS & CERTIFICATIONS

AI Systems & LLM Apps: RAG and hybrid retrieval (ChromaDB, sentence-transformers, BM25), multi-provider model routing, AI agents (Azure, Copilot), LoRA/QLoRA fine-tuning (peft, trl, Optuna), Haystack, Hugging Face, PyTorch

Engineering: Python, FastAPI, React, TypeScript, Next.js, SQL, Supabase (Postgres), Docker, GitHub Actions, Vercel, Azure AI, OCI AI

Data & Research: NLP (spaCy, BERT), agent-based simulation, econometrics, Salesforce, SAP, Anaplan

Certifications & Languages: ML Specialisation (Stanford), GenAI Fundamentals (Google Cloud), Math for ML (DeepLearning.AI), OCI AI (Oracle) | English, Hindi (professional), Telugu, Kannada (native/bilingual)
